

TURMADE IN MARKET

Professional Bears Cover
Shorts and Go Long.

SOLD OFF AT THE CLOSE

Only Fractions of Gains Left Where
They Were Not Entirely Wiped Out.

Relapse in Louisville and
Nashville.

(By Associated Press.)

NEW YORK, May 19.—To-day's recovery in the stock market was in accordance with the expectation of the majority of professional traders. This expectation produced materially to the recovery by restraining the professional bear element from further attack on prices. Yesterday's rather violent decline and the increase in the volume of trading over the sales, and the consequent gain, gave the impression of a culmination of the decline. There was some further decided liquidation in the market this morning, but the professional bear element failed of this to cover their outstanding short contracts. There was evidence of support also, presumably by those who had been buying values, especially in St. Paul and New York Central. The recent unsupported condition of these standard stocks has had a dominant influence on the whole speculative tone, and this morning's indications that the further decline was to be contested helped decide the bears to cover. The long continued decline offers attractive profits from the shorts, regardless of opinions on the future of the market. The professional traders, therefore, generally turned to the buying side, covering their short contracts, going long on the market, and looking for a further delay. There was very little news to account for this change in sentiment, the general condition of the market being such that prospects of further gold exports and other considerations which have caused the recent depression were not sufficient to overcome the market, which was sufficiently overvalued to make the turn for a rise effectual. But the market "bounced" in the Stock Exchange, and the market was active, at the last, leaving only fractions of the day's gains where they were not entirely wiped out.

Hidden relapse in Louisville and Nashville at the last, which more than wiped out its gains, may have had to do with the cotton market, another rumor which got about on the tide of the day's advance was an alleged purpose on the part of the Secretary of the Treasury to suspend the redemption of the 5 percent bonds which mature next year. No color of authority was obtainable for this rumor, but it was sufficient to cause a Sterling exchange ruled strong, and the supply of bills was very scarce. United States Steel stock, which had been trading at a high price, fell off a point, and the market fluctuated over a range of a point, closing with a net gain of 1/4; otherwise the bond market was irregular, and the market value of the United States bonds was unchanged on the last call. The total sales of stocks for the day were 555,000 shares.
